

Qwen-VL Skills

Universal File Visualizer

Supported Formats:

- PDF, SVG, XPS · PyMuPDF native rendering
- DOCX, PPTX, VSDX · LibreOffice conversion
- CSV, XLSX · pandas + matplotlib tables
- JS, TS, CSS · Pygments syntax highlighting
- HTML · Playwright browser screenshots
- DrawIO · XML/SVG diagram extraction
- SRT, VTT · Subtitle text parsing
- OBJ, STL, GLB · 3D model visualization
- GeoJSON, KML, SHP · GIS map rendering
- ipynb · Jupyter notebook cell rendering
- LaTeX · PDF compilation + rendering

Architecture

The visualize tool auto-detects file type by extension and dispatches to the appropriate renderer module.

Each renderer returns `list[PIL.Image.Image]`, which are then encoded as MCP content blocks.
